

SKYLINE WASTE RECEPTACLE

Model Number : SLTR-24

DESIGNER NOTES

With clean lines and architectural sensibility on display, this unit was designed to match the Skyline Series of benches. This solid top design allows access from all four sides, but still restricts the size and type of waste going into the unit. The water deflecting plate above the opening prevents water-filled garbage bags and makes it difficult for birds like crows or ravens to access. The built-in recessed handle lock and convenient side opening translate into easy cleaning and maintenance. A great addition to any park or city sidewalk.
